# AMWC ADVANCED FACIAL AESTHETIC MASTERCLASS

WEDNESDAY 4 APRIL 2018 · CAMILLE BLANC AUDITORIUM

In depth knowledge of **Clinical Facial Anatomy** combined with **Advanced Injection Techniques** ensure SAFE and Optimal results in Aesthetic Medicine. The AMWC Advanced Facial Aesthetic Masterclass is aimed at high level discerning doctors in aesthetic medicine. Two modules of The Top Ten clinically relevant Anatomic Zones will be the focus of each yearly masterclass.

**Central Forehead & Temple region** will be the focus of the morning program and **Lips & perioral region** will be covered in the afternoon.

Clinically relevant anatomy is mastered and demonstrated by top plastic surgeons who actually operate and see the **live anatomy** of facial tissues on a weekly basis. An equally eminent faculty of specialists have been selected to inject these focus zones and share the most relevant pearls and pitfalls aiming to safeguard and grow your aesthetic practice.

**Carefully selected models** with challenging features within the focus zones are selected with emphasis on cultural, ethnic and gender variations.

The lecture topics will be put into practice in the live show where paired injectors will have ample time to discuss surface anatomy, choice of filler and toxin, mode of injection, precautions and after care.

**R**ecent breakthrough in the aesthetic field and responding to the intimate needs of men and women, cosmetic gynecology and cosmetic andrology transform appearance of intimate zones to look younger and more natural. Different cosmetic procedures are used to reconstruct existing defects or inadequate conditions perceived by some patients. These procedures help them to regain self-confidence and can potentially improve intimate relationship and emotional life.

Despite an insufficient documentation on safety and effectiveness and undetermined standard of practice of genital cosmetic rejuvenation, a rising number of men and women are seeking these kinds of care and procedures.

**COURSE OBJECTIVES:** The course will provide an intensive training on invasive and non-invasive procedures in aesthetic gynecology, andrology and genital rejuvenation. With a heavy focus on LIVE DEMONSTRATIONS and VIDEO TUTORIALS, this course will emphasize practical content that can improve your technique with immediate results.

Upon completion of this module, the participants will be able to:

- Understand idea of different treatments and their applications
- Review treatment protocols
