DEAR COLLEAGUES AND FRIENDS,

We are pleased to invite you to participate in the International Congress of Aesthetic Dermatology (ICAD), taking place on 22–23–24 November 2018, in Bangkok, Thailand.

This year, ICAD will celebrate its 12th anniversary under the theme “Riding the Asian Wave”. ICAD is now the most established and largest international medical aesthetics congress in Southeast Asia, serving the growing needs of not only this very dynamic region, but also, increasingly, the rest of the world. ICAD is a high level of medical continuing education platform contributing to the medical community in confronting this challenging growth wave.

Built upon a long-term partnership between the Dermatological Society of Thailand (DST) and EuroMediCom, ICAD 2018 brings together Asian expertise and international networks to offer an unparalleled platform, with expert speakers and cutting edge scientific content.

ICAD 2018 seeks to address unique developments in the field of medical aesthetics. The next generation of medical practitioners and opinion leaders is causing a seismic change in the field, with new trends and developments constantly arising.

As always, ICAD 2018 will highlight highly practical content with several live demonstrations. Its program is didactically designed to provide an update latest news, trend and updates featuring state of the art in medical aesthetics. This edition, ICAD will be preceded by 2 pre-congress courses, advanced injectables and advanced laser & EBDs.

Join us in lively Bangkok and celebrate with us at ICAD 2018!

DIVERSITY OF FACIAL BEAUTY IN AESTHETIC PERSPECTIVE: HOW TO MANAGE?

OVERVIEW

Success of facial aesthetic procedures depends not only on improving individual structures but also on globally establishing the harmony of the face. Aesthetic practitioners should be sensitive to different concepts and diversity of beauty and appreciate a range of values rather than assume that all patients simply prefer the same beauty definition.

Designed for intermediate and advanced practitioners, this course will elaborate in detail to show how each invited expert treat various selected patient cases with different features. The experts will show their techniques of expertise to improve treatment outcomes and avoid complications. The content of this course is organized in a way to facilitate successful learning of participants through the experts’ vast experience and teaching ability on the application of their expertise and treatment strategies.

With their acquired extensive knowledge, the experts observe, organize and interpret clinical information to treat efficiently different cases presenting various levels of diversity. The learners will be guided to notice features and meaningful patterns of information reflecting contexts of applicability.

OVERVIEW

The target participants of this course include dermatologists and laser surgeons who already have a well-developed basic understanding of the uses of lasers and energy-based devices (EBDs) and are looking for advanced techniques on how to maximize the clinical outcome and minimize the risk of adverse effects in daily clinical practice on lasers and EBDs.

This course will feature a large and diverse group of the world leaders, and innovators in the fields of lasers and energy-based treatments. The course objectives focus on practical tips for physicians to learn cutting-edge aesthetic techniques and treatment pearls. It also provides understanding on proper treatment techniques, new treatment paradigms with lasers, emerging technologies, as well as new combination/multi-modal treatments.

This offers a wonderful opportunity to meet with and interact with world leaders in the field of lasers and EBDs in the same venue.

Over the years, ICAD has experienced tremendous growth and has now become the largest international congress dedicated to medical aesthetics in Asia.

70-80 exhibitors are expected to showcase this year. These industry partners are an integral part of the success of the show, bringing new technologies, devices and concepts.

Apart from its highly intense scientific program, another major highlight of ICAD is the Symposium Program, where industry partners are given a special platform to present their own new innovations.

During the following sponsored program/workshops, new products and technologies including live demonstrations will be conducted by their key opinion leaders:

ALLERGAN  ●  BIOSCIENCE (HYACORP)  ●  DAEWOONG PHARMACEUTICALS  ●  HANSBIOMED  ●  MERZ  ●  S.THEPHARM ULTRA V
