WELCOME

MESSAGE

Dear Friends, Dear Colleagues,

We are truly honored and excited to welcome all of you to the annual **AMWC congress on November 5-7, 2020 in Monte-Carlo**, under the High Patronage of H.S.H. Prince Albert II of Monaco.

Under the scientific supervision of the **Aesthetic Multispecialty Society (AMS)**, the Scientific Committee is honored to bring you prominent international thought leaders and a 3-day scientific program that promises to capture your attention and offers a complete platform for education, skills enhancement, business networking, and more.

The content is a perfect fusion of continuing education, training at the highest level, open exchange of information between delegates and key opinion leaders, live demonstrations and plenary sessions with world-class faculty delivering their insights and practice pearls on the most relevant and cutting-edge techniques and products in aesthetic & anti-aging practice.

In addition to the scientific program, AMWC 2020 also features the unmissable Pre-congress practical course on November 4:

ADVANCED FACIAL AESTHETICS MASTERCLASS

This masterclass presents a new dimension of treatment based on Core Facial Aesthetics.

The continued growth and success of AMWC have been due to a combination of excellent speakers, dedicated participants, and enthusiastic exhibitors creating a unique multi-specialty atmosphere. Over 380 leading international companies are showcasing on the 5-floor exhibition area.

Enjoy the AMWC 2020 and welcome to Monaco!

THE SCIENCE OF FACIAL AESTHETICS & ANTI-AGING

AMS

ADVANCED FACIAL AESTHETIC MASTERCLASS

Even though facial aesthetics is a fast-paced changing field with cultural and ethnical specificities, in-depth knowledge of **clinical facial anatomy** combined with **advanced injection techniques** will always be the pillars to ensure **safe and optimal results** in aesthetic medicine all over the world.

The Monaco Advanced Facial Aesthetic Masterclass is aimed at high level discerning doctors in aesthetic medicine interested in deepening their knowledge and improving their technique, as well as getting acquainted with the latest in facial aesthetics. Each year, we focus on two modules of the **top ten clinically relevant anatomic zones**. This year, we will cover **nose & nasolabial fold** enhancing techniques in the morning program, and cheek and zygoma in the afternoon.

The world's most prominent Plastic Surgeons, who operate and see the **live anatomy** of facial tissues on a weekly basis, will lecture and demonstrate on clinically relevant anatomy. The talks will be followed by an equally eminent faculty of Specialists, selected to inject these focus zones and share the most relevant pearls and pitfalls aiming to grow and safeguard your aesthetic practice.

We will **carefully select models** with challenging features within the focus zones in order to perform the most demanding and sophisticated live treatments. We will also emphasize cultural, ethnic and gender variations so you have the adequate tools should such treatment be required from you.

The lecture topics will be put into practice in the live show where paired injectors will have ample time to discuss surface anatomy, choice of filler and toxin, mode of injection, precautions and after care.
