ICAD RETURNS

Dear Friends, Dear Colleagues,

The International Congress of Aesthetic Dermatology (ICAD) returns this year! It is with great pleasure that we invite you to participate in the **15th annual iconic congress** on 24-25-26 November 2022, in Bangkok, Thailand.

ICAD is the most established and largest international medical aesthetics congress in Southeast Asia. It serves the growing needs of not only this incredibly dynamic region, but also increasingly, the rest of the world. This conference is known as a platform for high-level aesthetic dermatology education where professionals in an international community seek excellence.

Built upon a long-term partnership between the Dermatological Society of Thailand (DST) and EuroMediCom, ICAD is a fusion of **Asian expertise and global networks**, offering an unparalleled event that features world renowned speakers and cutting-edge scientific content.

In **2022**, ICAD finally returns to Bangkok to address developments in the field of medical aesthetics which have transpired over the past two years. And, there is a lot to catch up on. The next generation of medical practitioners and opinion leaders have caused a seismic change in the field and there are multitudes of new trends and innovations to be shared.

As always, **ICAD congress** will present highly practical content packed with live demonstrations for application directly to your practice.

Join us in vibrant Bangkok and celebrate the return of ICAD with us!

COMBINATION TREATMENT OF NON-INVASIVE AND MINIMALLY INVASIVE PROCEDURES FOR FACIAL AESTHETICS

Most of the patients seeking for aesthetic treatment require more than one type of procedure to achieve best outcome. Nowadays, there is a wide variety of treatments including neuromodulators, soft tissue augmentation, energy-based devices, as well as, thread lifting to reverse the aging face. Aesthetic practitioners should embrace combination treatments and obtain up-to-date knowledges on indications, treatment techniques, and prevention of complications, in order to provide safe and effective results.

AMPLIFICATION OF LASER APPLICATIONS IN AESTHETIC DERMATOLOGY

This pre-congress course features lectures and hands-on workshop presented by a large and diverse group of experts, and innovators in the fields of lasers and energy-based devices. The course objectives will focus on basic science and practical tips for physicians to learn on emerging technologies and treatment pearls. It also offers a wonderful opportunity to have hands-on experience and interact with leaders in the field lasers and EBDs in the same venue. The target participants of this pre-congress laser & energy-based device course include dermatologists and aesthetic physicians who already had a well-developed basic understanding of the uses of lasers and energy-based devices and are looking for emerging lasers and EBDs in aesthetic dermatology to apply to your daily clinical practice.
